A Program for audio playback based on location.

What does location have to do with Audio or Music?
Audio and Location

- **Edutainment**
  - A Guided tour through Paris or the WVU campus
- **Enhancing the Visual Experience Through Music**
  - User made "paths and tours"
  - Listen to the same music of others, while observing the same visuals
- **Book**
  - Become a character from a book
- **History**
  - The London Underground
  - The Civil War
Some Functionality

- Making playlists of your favorite music based on location
- Ability to share your playlists with others
- Access audio tours based on location

- Textual Augmentation
- Images
- Maps
Implementation

- HTML 5
